Float

- Legacy layout technique
- Elements can allow following elements to "float" up around them
- float: left;
- float: right;
- clear: left; -- no floating elements allowed on the left size

MDN reference for Float.

Display

- Block
  - starts on a new line
  - takes up full width
  - can set width/height
  - can contain block or inline elements
  - <div>, <p>, <ul>, <h1>, <header>
- Inline
  - does not start on a new line
  - takes only the width needed (can't set w/h)
  - <span>, <a>, <img>
